operation

Oil-free  
cutting

Space-saving. Customer-friendly. Ideal.

# MHS ideal SB.T

The **MHS ideal SB.T** has all of the functions of the large **MHS ideal SB**, but is flexible and can save you space. Simply utilise the space beneath your bread

cutting machine as before. The self-explanatory user guidance with symbols guides your customer through the cutting process with ease.

## Facts that impress

- Easy to use thanks to clear user guidance
- 3 preset slice thicknesses can be selected at the push of a button.
- Highest level of safety
- Service display on the rear
- Automatic slice holders
- Automatic bread gripper
- Maximum cutting quality due to round blade cutting
- Oil-free cutting, also of warm bread
- Extraction tray with crumb slots
- Quiet cutting - the special MHS blade reduces the cutting noise right from the outset
- Tested safety (GS-tested)
- Bag holder and clip retainer (optionally available)
- Matching table (optionally available)

## Hygiene that impresses

- Stainless steel housing (painted on request)
- Extraction tray with crumb slots
- Removable front cover for easy cleaning of blades and the cutting chamber without having to move the machine
- Unique - only with MHS: Rear wall simply removable for even easier cleaning of the back cutting chamber
- Functional parts easily accessible
- Blade cleaning position
- Hermetic encapsulation of the drive and electronics in the cutting chamber
