Hygienic. Economical. Ideal.

MHS ideal SB (S/M)

With the **MHS ideal SB**, you are close to your customers and their wishes. Thanks to the easy operation, the customer can decide how they want to have their bakery products sliced. Three preset

slice thicknesses can be individually selected at the push of a button. The MHS ideal SB cuts all types of bread. The MHS ideal SB is available in two different sizes (S/M).

Facts that impress

- Easy to use thanks to clear user guidance
- 3 preset slice thicknesses can be selected at the push of a button.
- Highest level of safety
- Automatic slice holders
- Automatic bread gripper
- Maximum cutting quality due to round blade cutting
- Oil-free cutting, even with warm breads
- Internal bagging tray
- Extraction tray with crumb slots
- Quiet cutting - the special MHS blade reduces the cutting noise right from the outset
- Drive with frequency converter protects the mechanical parts (soft start-up, soft stop)
- Tested safety (GS-tested)
- Bag holder and clip retainer (optionally available)

Hygiene that impresses

- Stainless steel housing (painted on request)
- Extraction tray with crumb slots
- Removable front cover for easy cleaning of blades and the cutting chamber without having to move the machine
- Functional parts easily accessible
- Blade cleaning position
- Hermetic encapsulation of the drive and electronics in the cutting chamber
